

Senior Product Designer (San Francisco, California - Design)

Ivo's AI contract platform is growing rapidly, and we're seeking an experienced designer to guide the vision, strategy and execution of our design system while managing a small team.

Role overview

- * Create, maintain and scale component libraries, design tokens, interaction patterns and accessibility standards.
- * Define and own the vision and roadmap for Ivo's design system, ensuring adoption and quality implementation across engineering.
- * Develop workflows (Figma libraries, documentation, quality checks) to improve designer/developer collaboration.
- * Establish best practices for design documentation and cross-team collaboration.
- * Consistently raise the bar for design craft and execution.

What you bring

- * 6+ years of experience in product design, design systems or front-end/UI engineering.
- * 2+ years of people management experience.
- * Expertise in building design systems for SaaS platforms.
- * Deep knowledge of Figma, component libraries and systematic file organization.
- * Ability to adapt to rapid changes in AI and UI/UX, adopting new AI tools intelligently.
- * Strong communication and documentation skills; ability to articulate system rationale.
- * Operate effectively in a fast-paced environment with multiple priorities.

Cultural fit

- * Do-what-it-takes attitude; no one to delegate to.
- * Relentlessly resourceful and strong internal urgency.
- * Excited about building a company; startup experience preferred.

Benefits

- * Competitive salary with equity; relocation/visa support and comprehensive medical benefits.
- * Unlimited PTO and on-site perks.
- * In-person role in San Francisco.
