

Software Engineer, Backend (San Francisco, California - Engineering)

At Ivo, Backend Engineers build the systems that make our AI platform possible.

****Role****

- * Build backend systems to process and analyze millions of contracts reliably.
- * Design pipelines that orchestrate LLMs, data extraction and clustering algorithms at scale.
- * Create accurate search and retrieval systems.
- * Collaborate with product and legal experts to develop new capabilities.

****Mission****

Automate legal drudgery and improve lives by deploying AI at scale.

****Cultural fit and qualifications****

- * Love writing code but prioritize impact and pragmatic solutions.
- * Relentlessly resourceful with a strong sense of urgency.
- * Startup experience is welcome but not required.
- * Excited about building a company.

****Compensation & benefits****

- * Salary range roughly \$130K-\$485K plus equity.
- * In-office culture with some hybrid flexibility.
- * Comprehensive benefits and unlimited PTO.
