

Software Engineer, Frontend (San Francisco, California - Engineering)

Frontend Engineers at Ivo craft real-time, collaborative AI-enabled interfaces that delight users.

****Role****

- * Build high-performance user interface code.
- * Design and implement frontend components that integrate directly with LLM-powered agents.
- * Create real-time, collaborative interfaces that help legal teams work efficiently.
- * Collaborate with designers, lawyers and engineers to re-imagine legal work in the AI age.

****Mission****

Free lawyers from contract drudgery through an AI-native platform.

****Cultural fit****

- * Love writing code but care even more about product impact; look for 80/20 solutions.
- * Relentlessly resourceful with urgency to ship quickly.
- * Startup experience is a plus.
- * Excited about building a company.

****Compensation & benefits****

- * Salary range roughly \$130K-\$485K plus equity.
- * In-office culture with hybrid flexibility.
- * Comprehensive benefits and unlimited PTO.
