

Software Engineer, Infrastructure (San Francisco, California - Engineering)

Infrastructure Engineers build the foundation of Ivo's AI platform.

**\*\*Role\*\***

- \* Own and design the future of our environment; today's minimal footprint gives freedom to define the system.
- \* Manage deployments for each customer (separate containers, databases, VPCs) and orchestrate large numbers of deployments.
- \* Instrument systems to understand performance bottlenecks and errors; build dashboards and pager alerts.
- \* Lead on-call rotations and incident response.
- \* Improve CI/CD to reduce build times.
- \* Explore frontier DevOps such as real-time LLM evaluations and autonomous agents to detect production issues.

**\*\*Mission\*\***

Free lawyers from legal drudgery by operating a reliable, high-performance AI platform.

**\*\*Cultural fit\*\***

- \* Love writing code but focus on impact; pragmatic and resourceful.
- \* Bias toward urgent action.
- \* Startup experience welcome.
- \* Passionate about AI and excited to push the DevOps frontier.

**\*\*Compensation & benefits\*\***

- \* Salary range roughly \$225K-\$485K plus equity.
- \* In-office culture with hybrid flexibility.
- \* Comprehensive benefits and unlimited PTO.
